Many thanks, Brad.

This is helpful information.

I am scheduled to be out of the office tomorrow, but may be checking in via email.

A follow-up item from one of our recent calls -

Are you or Joe preparing the ownership/corporate transfer/name change etc. history that we discussed? I know we talked about it, and I think that I asked for it, and perhaps Joe said he would pull that together, but my memory is not clear on that matter. In any case, we would like that and will also be providing it to IDEM.

Thanks again.

Carolyn

Carolyn

Good morning. As a follow-up to our conference call earlier this week, please find attached tables which summarize the soil, groundwater, and sub slab vapor/indoor air samples obtained immediately before, during, and after the supplemental in-situ Fenton's Reagent injection activities. The injection activities occurred between July 2011 and May 2012. I have also attached a timeline summarizing the supplemental investigation/remediation activities completed at the site between December 2006 and August 2012.

Tables summarizing the estimated total VOCs recovered by the existing groundwater pump and treat system over the last 12 calendar quarters (3 years) is also provided for your reference.

Please contact me with questions or if you need anything else. I am scheduled to be out of the office today and tomorrow but should be able to be reached by cell phone if there is anything you need while I am out. I will also have limited access to email so alternatively you can email me any questions you have.

Sincerely,

Bradley E. Gentry, LPG
